```java
package service;

import java.rmi.Naming;
import java.rmi.registry.LocateRegistry;

import serveur.CalculatriceImpl;

public class CalculatriceServer {
  public static void main(String[] args) {
    try {
      LocateRegistry.createRegistry(6969);
      CalculatriceImpl cal = new CalculatriceImpl();

      String url = "rmi://localhost:6969/Calculatrice";

      Naming.rebind(url,cal);

    }catch(Exception e) {
      e.printStackTrace();
    }

  }

}
```
